

MILL CREEK FAMILY YMCA EMERGENCY ACTION PLAN FOR SEVERE ALLERGIC REACTION

Student: _____ Birth Date: _____ Allergic to: _____

Does this student also have Asthma? No Yes (higher risk for severe reaction)

Extremely reactive to the following food/other allergens: _____

THEREFORE:

- If checked, give epinephrine immediately for **ANY** symptoms if likely exposed to the allergen or food allergen was eaten.
- If checked, give epinephrine immediately if definitely exposed to any allergen, **EVEN IF NO SYMPTOMS ARE APPARENT.**

Any **SEVERE SYMPTOMS** after suspected or known ingestion

One or more of the following

- Lung: Short of breath, wheeze, repetitive cough
- Heart: Pale, blue, faint, weak pulse, dizzy, confused
- Throat: Tight, hoarse, trouble breathing/swallowing
- Mouth: Obstructive swelling (tongue and/or lips)
- Skin: Many hives over body

OR combination of symptoms from different body areas:

- Skin: Hives, itchy rashes, swelling (e.g. eyes, lips)
- Gut: Vomiting, diarrhea, abdominal cramping/pain

1. INJECT EPINEPHRINE IMMEDIATELY

*2ND dose can be given in 5 minutes or more if symptoms persist or recur

2. Call 911
3. Begin monitoring (see box below)
4. Give additional medications:
 - Antihistamine
 - Inhaler (bronchodilator) if Asthma

*Antihistamines & inhalers/bronchodilators are **NOT** to be depended upon to treat a severe reaction (anaphylaxis) -

USE EPINEPHRINE.

MILD SYMPTOMS ONLY

- Mouth: Itchy mouth
- Skin: A few hives around mouth/face, mild itch
- Gut: Mild nausea/discomfort

1. GIVE ANTIHISTAMINE

2. Stay with student; alert health care professionals and parent
3. If symptoms progress (see above), **USE EPINEPHRINE**
4. Begin monitoring (see box below)

MEDICATION / DOSES:

Epinephrine: Epinephrine Jr. 0.15mg **OR** Epinephrine 0.3mg

Antihistamines: Benadryl/Diphenhydramine 12.5mg/5ml ____ tsp(s) **OR** 25mg ____ tab(s)

OR: _____

*Liquid antihistamine would be preferable over tables IF AVAILABLE

Other: (e.g. inhaler/bronchodilator if asthmatic): Albuterol/Xopenex - 2 puffs or _____

MONITORING: Stay with student. Alert healthcare professionals and parents.

- Tell rescue squad epinephrine was given; request an ambulance with epinephrine.
- Note time when epinephrine was administered. A 2nd dose can be given 5 minutes or more after the first if symptoms persist or recur.
- For a severe reaction, consider keeping student lying on back with legs raised.
- Treat student even if parents cannot be reached. See back/attached for auto-injection technique.

THE SEVERITY OF THE REACTION CAN CHANGE QUICKLY AND MAYBE SIGNIFICANTLY MORE SEVERE THAN PREVIOUS REACTIONS.

EpiPen and EpiPen Jr Auto-Injector

3-Step Easy To Follow Instructions:

1. PREPARE THE EPIPEN OR EPIPEN JR AUTO-INJECTOR FOR INJECTION

- Remove the auto-injector from the clear carrier tube.
- Flip open the yellow cap of your EpiPen or the green cap of your EpiPen Jr Auto-Injector carrier tube.
- Tip and slide the auto-injector out of the carrier tube.
- Grasp the auto-injector in your fist with the orange tip pointing downward.
- With your other hand, remove the blue safety release by pulling straight up without bending or twisting it.

2. ADMINISTER THE EPIPEN OR EPIPEN JR AUTO-INJECTOR

- Hold the auto-injector with orange tip near the outer thigh.
- Swing and firmly push the orange tip against the outer thigh until it 'clicks'. Keep the auto-injector firmly pushed against the thigh at a 90° angle (perpendicular) to the thigh.
- Hold firmly against the thigh for approximately 10 seconds to deliver the drug. The injection is now complete.

3. FINALIZE THE INJECTION PROCESS

- Remove the auto-injector from the thigh. The orange tip will extend to cover the needle.
- Massage the injection area for 10 seconds.

Get emergency medical help right away

You may need further medical attention. You may need a second EpiPen or EpiPen Jr Auto-Injector should symptoms persist or recur.

How to use Auvi-Q™

1. PULL AUVI-Q™ FROM THE OUTER CASE

- Do not proceed to step 2 until you are ready to use Auvi-Q™.
- If not ready to use, replace the outer case.

2. PULL OFF THE RED SAFETY GUARD

- To avoid an accidental injection, never touch the black base of the auto-injector.
- If an accidental injection does occur, seek medical help immediately.

NOTE: The safety guard is meant to be tight. Pull firmly to remove.

3. PLACE BLACK END AGAINST THE MIDDLE OF OUTER THIGH

- Place black end against the middle of the outer thigh (through clothing, if necessary)
- Then press firmly and hold in place for 5 seconds.
- Each device is a single-use injection.
- Only inject into the middle of the outer thigh (upper leg).
- Do not inject into any other location.
- Note: Auvi-Q™ makes a distinct sound (click and hiss) when activated. This is normal and indicates Auvi-Q™ is working correctly.
- Do not pull Auvi-Q™ away from your leg when you hear the click and hiss sound.

4. SEEK MEDICAL ATTENTION IMMEDIATELY

Replace the outer case and take your used Auvi-Q™ with you to a healthcare professional for proper disposal and a prescription refill.
